Comment. As the tabulation is incomplete, no comparisons can be made with the volume of fuel shipments reported for September. The unusually large number of fuel shipments dispatched to the Aken fuel depot are of interest. These shipments, which amounted to 158 railroad tank cars loaded with 2,842 metric tons of fuel, represent an average monthly delivery as previously observed. As fuel was certainly shipped to Aken also during the first half of October, it must be assumed that an increased amount of fuel will be dispatched to Aken in October.
